

Wisdom Chukwuma

Full-Stack Developer · 3D Web · AI Engineer

Lagos, Nigeria | kenewisdom4@gmail.com

wisdomchuks.cv | github.com/wisdom-chukwuma | x.com/wisdomchukwumaa

PROFILE

Computer Science student at Babcock University who ships complete products, from the database to the domain. Built and runs Wiscot, a real-time Django platform on a self-managed VPS, and delivered two live client platforms in 2026 (PHP/MySQL on cPanel). Also builds AI video pipelines around generative models. Looking for a developer role or internship where I can keep shipping.

EXPERIENCE

Founder & Lead Developer, Wiscot (wiscot.xyz) 2024 – Present

- Built a social and gaming platform on Django 5, Django REST Framework, Channels, Redis and PostgreSQL, with real-time chat and notifications over WebSockets.
- Implemented WebRTC voice and video calls with a self-hosted Coturn TURN server, Flutterwave payments, and OAuth sign-in (Discord, GitHub, Twitter, TikTok).
- Added image moderation with NudeNet and OpenCV, a three.js 3D game lobby, and an Android build through Capacitor.
- Run production myself on an Oracle Cloud VPS: Nginx, Unicorn and Daphne, Redis, PostgreSQL, SSL.

Freelance Web Developer, Client work 2026

- Gala FPL Challenge (gala-fpl.com.ng): built and deployed a fantasy-football challenge platform for Gala/UAC Foods on PHP 8.1 and MySQL, with cron-driven score sync, Google sign-in, Web Push and encrypted payout details. About 1,000 entrants.
- Jigsimur Eagle Team (jigsimureagleteam.com.ng): built a member portal and store for a distributor network: Google sign-in, orders and stock groups, geofenced seminar check-ins, referral family tree, admin panel.

Web Development Trainee (SIWES), New Horizons Nigeria Jan – Jun 2026

- Completed a 21-week frontend and backend web development track: HTML, CSS, JavaScript, Python, Django and React.
- Built W-Movies, a movie discovery site on the TMDB API, and hrProject, a Django employee-management app.

SELECTED PROJECTS

- Worship The King.** Firebase PWA for a church youth week: nickname sign-in, four competing squads, timed check-ins, photo and shoutout wall, scheduled push reminders. Live at asc-youth-week.netlify.app.
- AI video pipelines.** WappyDrama (Gemini Veo drama series), WappyTales (Wan 2.1 on a free Kaggle GPU with ElevenLabs voices), Woverico and TBT: automated script-to-video workflows.
- StudyPath and RentNest.** StudyPath turns lecture .pptx files into practice material (Python). RentNest is a Nigeria-focused rental platform built in React, Vite and Tailwind.

SKILLS

Backend	PHP 8, MySQL, Python, Django, Django REST Framework, Channels, Redis, PostgreSQL, WebSockets, REST APIs, OAuth and Google sign-in, Flutterwave payments
Frontend	HTML5, CSS3, JavaScript (ES6+), React, Vite, Tailwind, responsive and mobile-first design, PWAs, three.js (3D web), Capacitor
Real-time & integrations	WebSockets, WebRTC (self-hosted Coturn), Web Push, Cloudinary, Firebase (Auth, Firestore, Storage, Cloud Functions)
Hosting & DevOps	cPanel shared hosting, FTP/scripted deploys, cron jobs, DNS (A, CNAME, NS delegation), SSL/HTTPS, domain registration and connection, Nginx, Unicorn/Daphne, Linux VPS (Oracle Cloud), Vercel, Netlify, Firebase, Git/GitHub
AI & automation	Gemini Veo, ComfyUI/Wan 2.1, ElevenLabs, Piper TTS, faster-whisper, Playwright, ffmpeg, NudeNet/OpenCV

EDUCATION

Babcock University, B.Sc. Computer Science	2023 – 2027 (expected)
Radiance High School, Festac. Graduated first in Coding and Robotics	2023
Frontend course (HTML, CSS, JavaScript), New Horizons Nigeria	2023
2nd place, EduPoint RoboCode Fest 1.0: a smart bin with Arduino (C++) and an ultrasonic sensor	2022
